

Cut out the sea creatures in groups in the right number and then stick them in the relevant spaces.
Use the explanations to teach the children beach safety. Laminate for extra durability.

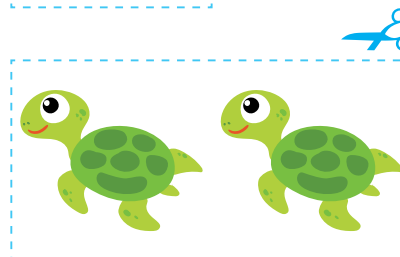

Clown fish

It is always important to go to the beach with an adult like Nemo does with Marlin. Make sure you always stay near a responsible adult when you're at the beach.

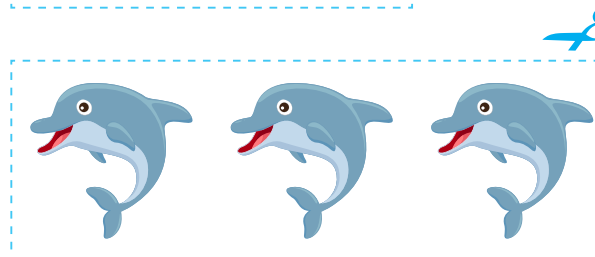

Sea Turtles

Turtles are very cool and relaxed. You can be like a turtle if you are in any trouble in the water by staying calm, putting your hand up and a lifesaver will come and help you.

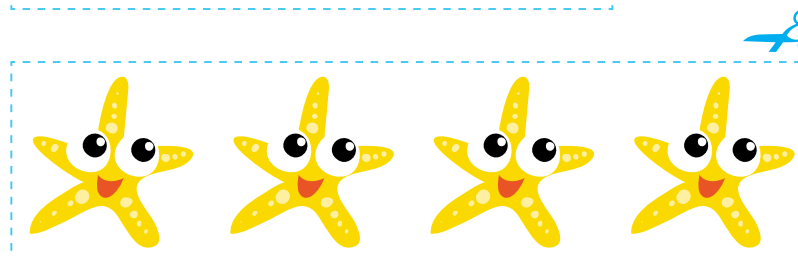

Dolphins

Dolphins always swim with each other and never swim alone. When you are at the beach always go swimming with your family and look out for each other.

Starfish

Starfish live in tidal pools, rocky shores and coral reefs and creep along the ocean floor. They have really bright colours so they can hide amongst plants and corals.

Sand Crab

Sand crabs can only go backwards! They live on the beach where the waves wash up. So keep an eye out for them!
