

Shark Tracking Technology Inquiry and Resources

You are a Marine Biologist who is making a presentation at the Annual Conference for Marine Scientists from across the world who want to learn more about the Shark Technology we use in Australia so they can use it in their own country.

Go to <https://www.sharksmart.nsw.gov.au/technology-trials-and-research> webpage. Pick ONE of the technologies to create your presentation for the conference. You will need to include the following in your presentation:

- Name of the technology you are investigating
- What are the tasks the technology is designed to perform?
- How does the technology work? Include whether it has been used with other technologies.

- How what happens when a shark is detected using the technology?
- What are the benefits and issues with using the technology?
- How effective is the technology?

(Use the Shark Tracking Technology Inquiry planning sheet to assist you in your research. Make sure you include videos, diagrams, pictures, maps to make your presentation interesting)
